DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The title to the application has been amended to better identify the inventive concept as follows: -- Method and System for Synchronizing Two End Terminals Using Beacon Synchronization With Multiple Channels in a Wireless Local Area Network -- .

Allowable Subject Matter

Claims 1-20 are allowed. The following is an examiner's statement of reasons for allowance: as to claims 1, 7, 10, 17 and 20, the prior art made of record teaches the Medium Access Control (MAC) of the IEEE 802.11 standard which provides for the synchronization of wireless terminals in an infrastructure or ad hoc network but does not teach synchronizing two end terminals using beacon synchronization via a plurality of channels comprising calculating a beacon interval offset value and setting the interval between the beacon frames in the first channel and the interval between the beacon frames in the second channel based on the calculated offset value so as to perform beacon synchronization.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon but considered pertinent to applicant's disclosure includes May (Us 2004/0125787), Barber (US 2005/0286446), Myles et al. (US 7,151,945) and Hori et al. (US 7,221,667).
